

## JZ4780 SD Burn Step2: Re-burn Warrior PAD

### 1. Preparing

#### 1.1 Copy necessary files into the SD card

##### 1.1.1 Configuration files

There are 2 configuration files: burning\_list.txt and config.txt.

##### 1.1.2 Binary files

There are 3 binary files: x-boot-nand.bin, boot.img and system.img

### 2. Re-burn

#### 2.1 Make the board into SD card Burn mode

- Plug in the DC power supply.
- Press vol- and do a reset.

**Note:** Keeping vol- pressed until seeing the boot logo (A green Android robot).

#### 2.2 Finish

There will be friendly messages during the whole progress. And the board will reboot automatically after the progress is over.
